PROJECTS

ERSTE Foundation is a creative workshop for ideas and innovation, a lab for topics of the future which increases its effectiveness through the strategic cooperation with networks. Our activities in four thematic areas are based on the believe that most people want others to do well and should be supported to do so, that financial literacy is life literacy, that the European idea is worth fighting for, that culture is a central part of our identity and that every society needs Culture.

Empower those wo care

Many people are personally active on behalf of others, whether professionally or on a voluntary basis. That is why we support those who are committed to changing our society for the better. We invest in the development of new digital approaches, in capacity building and organisational development of NGOs and in the expansion of networks between sustainable social enterprises. We aim to empower people who actively address the social challenges of our time.

Financial Health for All

Everyone wants to attain financial independence and live in dignity and prosperity. To achieve these goals, we need a sound understanding of how to handle money. Everyone should have access to this knowledge. We provide young and older people with opportunities to increase their financial literacy and develop tools to enable those who are in a difficult financial situation to regain their ability to act and thus reclaim their personal freedom.

Preserve a democratic Europe

Complex problems such as the climate crisis, the negative consequences of globalisation and radical changes in the presence and use of media and information have aroused fears and pessimism in many people. Simple solutions sound tempting but make the situation worse. We aim to bring together the best brains and political decision-makers, promote first-rate journalism in the public interest and help shape the debate about a resilient, democratic, united Europe.

Protect contemporary culture

Culture strengthens the complex identities in Eastern Europe's societies. We therefore want to explore important artistic practices in the recent Eastern European past. The cultural heritage of dissident history must be secured and made accessible to an international audience. Artists need (free) spaces for their production, theorists need international recognition; and both, work and interpretation, should be accessible.
